

PREVENT FRAUD WITH MULTI-FACTOR AUTHENTICATION

Keeping your information secure is challenging. One of the most effective ways to protect your information is also the simplest. **Enable multi-factor authentication for access to your online email accounts.**

What is Multi-Factor Authentication?

A user must pass several authentication stages to gain access to the account. Usually one stage will involve something you know (such as a password) and the other will involve something you have (such as a phone).

> If your email access does not automatically require multi-factor authentication, check your account settings to enable it.

Did you know?

Wire fraud is on the rise.

A primary method used by fraudsters is to hack into email accounts of parties involved in a transaction. Multi-factor authentication is one way to protect yourself!

Title Security Agency is dedicated to protecting personal information. Ask us how we protect our clients' confidential information.

EXAMPLES OF AUTHENTICATION STAGES:

- > **PASSWORDS (USE STRONG PASSWORDS THAT EXCLUDE PERSONAL, PUBLIC INFORMATION)**
- > **ANSWERS TO SECURITY QUESTIONS**
- > **SELECTION OF A PRE-DETERMINED IMAGE**
- > **PIN ENTRY**
- > **BIOMETRIC INFORMATION (E.G. FINGERPRINTS, VOICE RECOGNITION)**
- > **"TOKENS" POSSESSED BY THE ACCOUNT HOLDER SUCH AS A CARD, WIRELESS TAG, OR USB**
- > **CODE SENT TO EMAIL OR PHONE**
